Turning On the Projector

Turn on the computer or video equipment you want to use before you turn on the projector so it can display the image source.

1. Open the projector's lens cover.

2. Connect the power cord to the projector's power inlet.

3. Plug the power cord into an electrical outlet.

The projector's power light turns orange. This indicates that the projector is receiving power, but is not yet turned on (it is in standby mode).

Note: With Direct Power On turned on, the projector turns on as soon as you plug it in.

4. Press the power button on the projector or the remote control to turn on the projector.

The projector beeps and the power light flashes green as the projector warms up. After about five seconds, the power light stops flashing and turns green.

Warning: Never look into the projector lens when the lamp is on. This can damage your eyes and is especially dangerous for children.

If you do not see a projected image right away, try the following:

- · Verify the lens cover is open all the way.
- Turn on the connected computer or video device.
- Insert a DVD or other video media, and press the play button (if necessary).
- Press the **Source Search** button on the projector or remote control to detect the video source.

Turning Off the Projector

Before turning off the projector, shut down any computer connected to it so you can see the computer display during shutdown.

Note: Turn off this product when not in use to prolong the life of the projector. Lamp life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

1. Press the power button on the projector or the remote control.

The projector displays a shutdown confirmation screen.

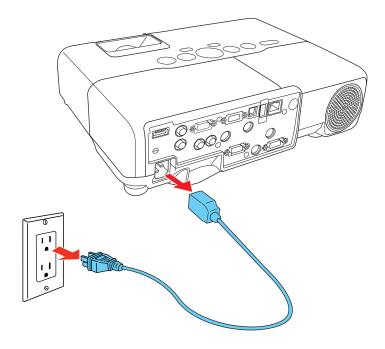

Power Off? Yes: Press (b) button No : Press any other button

2. Press the power button again. (To leave it on, press any other button.)

The projector beeps twice, the lamp turns off, and the power light turns orange.

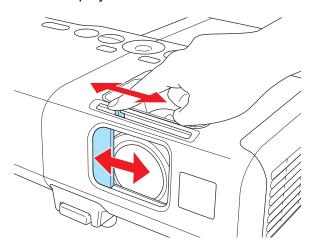

Note: With Epson's Instant Off technology, there is no cool-down period so you can pack up the projector for transport right away (if necessary).

3. To transport or store the projector, make sure the power light is orange (but not flashing), then unplug the power cord.

Caution: To avoid damaging the projector or lamp, never unplug the power cord when the power light is green or flashing orange.

4. Close the projector's lens cover.

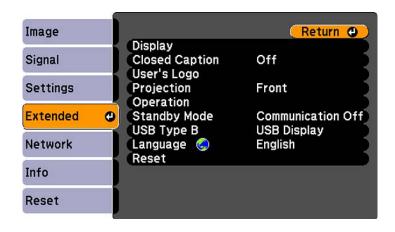

Parent topic: Using Basic Projector Features

Selecting the Language for the Projector Menus

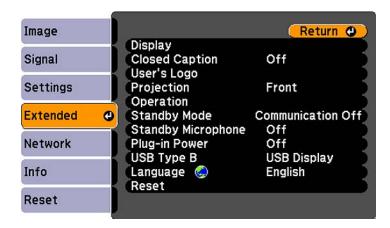

If you want to view the projector's menus and messages in another language, you can change the Language setting.

- 1. Turn on the projector.
- 2. Press the **Menu** button.
- 3. Select the **Extended** menu and press **Enter**.

PowerLite 92/93

PowerLite 95/96W/905/915W/935W/1835

Note: The Network menu does not appear on non-network projector models.

Note: The PowerLite 935W includes a Standby Audio setting (not shown).

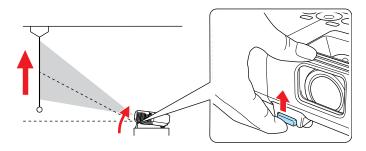

- 4. Select the **Language** setting and press **Enter**.
- 5. Select the language you want to use and press **Enter**.
- 6. Press **Menu** or **Esc** to exit the menus.

Parent topic: Using Basic Projector Features

Adjusting the Image Height

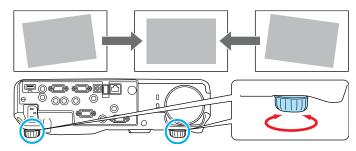

If you are projecting from a table or other flat surface, and the image is too high or low, you can adjust the image height using the projector's adjustable feet.

- 1. Turn on the projector and display an image.
- 2. To adjust the front foot, pull up on the foot release lever and lift the front of the projector.

The foot extends from the projector.

- 3. Release the lever to lock the foot.
- 4. If the image is tilted, rotate the rear feet to adjust their height.

If the projected image is unevenly rectangular, you need to adjust the image shape.

Image Shape

You can project an evenly rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilted up or down, or off to the side, you may need to correct the image shape for the best display quality.

When you turn on automatic keystone correction in your projector's Settings menu, your projector automatically corrects keystone effects when you reposition the projector.

Parent topic: Using Basic Projector Features

Correcting Image Shape with Quick Corner

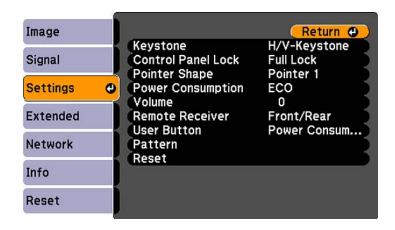

You can use the projector's Quick Corner setting to correct the shape and size of an image that is unevenly rectangular on all sides.

1. Turn on the projector and display an image.

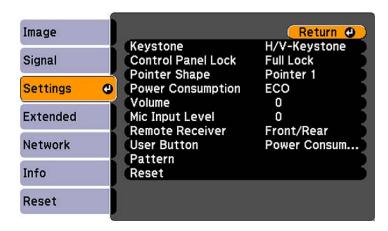

Note: You can display a pattern to aid in adjusting the projected image using the Settings menu.

- 2. Press the **Menu** button.
- 3. Select the **Settings** menu and press **Enter**.

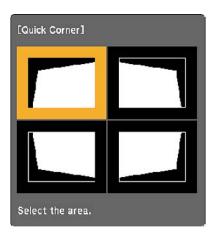

PowerLite 92/93

PowerLite 95/96W/905/915W/935W/1835

- 4. Select the **Keystone** setting and press **Enter**.
- 5. Select the **Quick Corner** setting and press **Enter**. Then press **Enter** again. You see the Quick Corner adjustment screen.

- 6. Use the arrow buttons on the projector or the remote control to select the corner of the image you want to adjust. Then press **Enter**.
- 7. Press the arrow buttons to adjust the image shape as necessary.
- 8. When you are finished, press **Esc**.

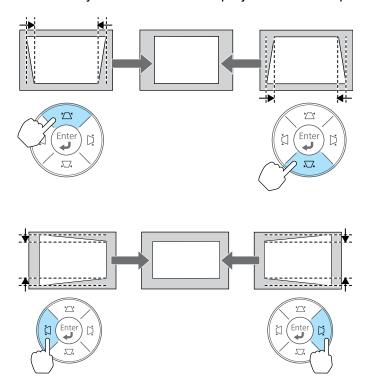

Parent topic: Image Shape

Correcting Image Shape With the Keystone Buttons

You can use the projector's keystone correction buttons to correct the shape of an image that is unevenly rectangular on the sides.

1. Turn on the projector and display an image.

2. Press a keystone button on the projector's control panel.

After correction, your image is slightly smaller.

Note: If the projector is installed out of reach, you can also correct the image shape using the Keystone settings in the projector menus.

Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room, up to 19.7 feet (6 m) away. You can point it at the screen, or the front or back of the projector.

Make sure that you aim the remote control at the projector's receivers within the angles listed here.

- 1 30°
- 2 19.7 feet (6 m)

Note: Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.

Replacing the Remote Control Batteries

Using the Remote Control as a Wireless Mouse

You can use the projector's remote control as a wireless mouse so you can control your computer presentation from a distance.

Note: You cannot use the remote control's wireless mouse function when you use your projector's USB Type B port to project video. However, you can use the **Up** and **Down Page** buttons to move through a presentation.

- 1. Connect the projector to a computer using the projector's **Computer** or **HDMI** port.
- 2. Using a USB cable, connect the projector's USB **TypeB** port to a USB port on your computer (for wireless mouse support).
- Press the Menu button, select the Extended menu, and select Wireless Mouse as the USB Type B setting.
- 4. Start your presentation.
- 5. Use the following buttons on the remote control to control your presentation:
 - To move through PowerPoint slides, press the **Up** and **Down Page** buttons.

- To move the cursor on the screen, use the arrow buttons.
- To left-click, press the **Enter** button once (press it twice to double-click).
- To right-click, press the **Esc** button.
- To drag-and-drop, hold the **Enter** button as you move the cursor with the arrow buttons, then release **Enter** at the destination.

Selecting an Image Source

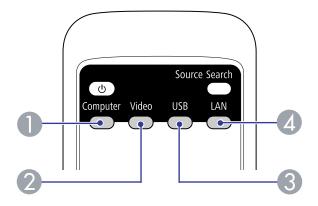

If you connected multiple image sources to the projector, such as a computer and DVD player, you may want to switch from one image source to the other.

- 1. Make sure the connected image source you want to use is turned on.
- 2. For video image sources, insert a DVD or other video media and press its play button (if necessary).
- 3. Do one of the following:
 - Press the **Source Search** button on the projector or remote control until you see the image from the source you want.

• Press the button for the source you want on the remote control. If there is more than one port for that source, press the button again to cycle through the sources.

- 1 Computer port sources
- 2 Video and HDMI sources
- 3 USB port sources (computer display and external devices)
- 4 Network source (PowerLite 93/95/96W/905/915W/935W/1835)

Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- Front (default setting) lets you project from a table in front of the screen.
- Front/Ceiling flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.
- Rear flips the image horizontally to project from behind a translucent screen.
- **Rear/Ceiling** flips the image over top-to-bottom and horizontally to project from the ceiling and behind a translucent screen.

You can change the projection mode using the remote control or by changing a menu setting.

Image Aspect Ratio

The projector can display images in different width-to-height ratios called aspect ratios. Normally the input signal from your video source determines the image's aspect ratio. However, for certain images you can change the aspect ratio to fit your screen by pressing a button on the remote control.

If you always want to use a particular aspect ratio for a certain video input source, you can select it using the projector's menus.

Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image to resize it.

- 1. Turn on the projector and switch to the image source you want to use.
- 2. Press the **Aspect** button on the remote control.

The shape and size of the displayed image changes, and the name of the aspect ratio appears briefly on the screen.

3. To cycle through the available aspect ratios for your input signal, press the **Aspect** button repeatedly.

Parent topic: Image Aspect Ratio

Available Image Aspect Ratios

You can select the following image aspect ratios, depending on the input signal from your image source.

Note: Black bands and cropped images may project in certain aspect ratios, depending on the aspect ratio and resolution of your input signal.

PowerLite 92/93/95/905/1835

Aspect ratio setting	Description	
Auto	Automatically sets the aspect ratio according to the input signal.	
Normal	Displays images using the full projection area and maintains the aspect ratio of the image.	
4:3	Displays images using the full projection area at 4:3 aspect ratio.	
16:9	Converts the aspect ratio of the image to 16:9.	

PowerLite 96W/915W/935W

Aspect ratio setting	Description	
Auto	Automatically sets the aspect ratio according to the input signal.	
Normal	Displays images using the full projection area and maintains the aspect ratio of the image.	
16:9	Converts the aspect ratio of the image to 16:9.	
Full	Displays images using the full width of the projection area, but does not maintain the aspect ratio.	
Zoom	Displays images using the full width of the projection area and maintains the aspect ratio of the image.	
Native	Displays images as is (aspect ratio and resolution are maintained).	

Note: The **Auto** aspect ratio setting is available only for HDMI image sources.

Parent topic: Image Aspect Ratio

Color Mode

The projector offers different Color Modes to provide optimum brightness, contrast, and color for a variety of viewing environments and image types. You can select a mode designed to match your image and environment, or experiment with the available modes.

If you always want to use a particular color mode for a certain video input source, you can select it using the projector menus.

Turning On Auto Iris

In certain color modes, you can turn on the Auto Iris setting to automatically optimize the image based on the brightness of the content you project.

- 1. Turn on the projector and switch to the image source you want to use.
- 2. Press the **Menu** button.

3. Select the **Image** menu and press **Enter**.

4. Select the **Auto Iris** setting and select **On**.

Note: You can turn **Auto Iris** on or off for each Color Mode that supports the feature. You cannot change the **Auto Iris** setting when you are using a **Closed Caption** setting.

5. Press **Menu** or **Esc** to exit the menus.

Parent topic: Color Mode

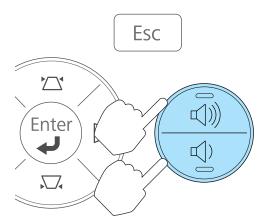

Controlling the Volume with the Volume Buttons

You can use the **Volume** buttons on the projector or the remote control to adjust the volume as you project a presentation with audio. The volume buttons control the projector's internal speaker system or any external speakers you connected to the projector.

You must adjust the volume separately for each connected input source.

1. Turn on the projector and start a presentation that includes audio.

2. To lower or raise the volume, press the **Volume** buttons on the remote control or these buttons on the control panel.

A volume gauge appears on the screen.

3. To set the volume to a specific level for an input source, you can set the volume using a projector menu.
